IMPORTANT CONSIDERATIONS

STORAGE OF LIQUID & DRY FERTILIZER (SMALL QUANTITIES)

PESTICIDE & FERTILIZER BMP #3

Photo courtesy of Creative Commons

Description:
Protect water quality through appropriate storage of dry fertilizer (< 25 tons) and liquid fertilizer (<5,000 gallons).

AWQA Minimum Requirements:
Store in properly labeled containers that are chemically compatible with the fertilizer. Storage containers and appurtenances shall be constructed, installed, and maintained to prevent the discharge of liquid fertilizer. **Clean up spills immediately.** Store fertilizers and pesticides separately from one another and away from foodstuffs and feed. Read and follow label directions for storage.

Recommendations:
Use proper storage practices even if fertilizers are on site for only a short time (e.g., in springtime before plantings). Even seasonal storage can result in spills or leaks that can pollute groundwater. Develop a plan to deal with fertilizer spills, including spill site management and storage site clean up.
